Exhibit A. Origin and Breeding History of the Variety

Soybean Variety 92B52

Variety 92B52 evolved from a cross of variety MO30421 x Conrad.

It is an F4-derived variety which was advanced to the F4 generation by modified bulk descent. The F5 progeny row of 92B52 was grown in Iowa during the summer of 1992. Subsequently, 92B52 has undergone four years of extensive testing and purification and has been observed by the breeder to be uniform and stable for all plant traits from generation to generation, with no evidence of variants. On the basis of high yield for maturity, variety 92B52 was advanced to commercial status.

The breeder seed purification block of 92B52 was produced during the summer of 1994 and 15 sublines were bulked for increase. One-half acres of 92B52 (breeders seed) was grown in Chile during the winter of 1994. 21 acres of parent seedstock (foundation seed equivalent were grown during the summer of 1995. 350 acres of parent seedstock were grown during the summer of 1996.

Exhibit B. Statement of Distinctness

Soybean Variety 92B52

Variety 92B52 is most similar to variety 9273. Both varieties have purple flowers, and yellow seeds. However, 92B52 has light tawny pubescence and brown hila whereas 9273 has tawny pubescence and black hila.

Exhibit D. Additional Description of the Variety

Soybean Variety 92B52

In Exhibit C we have identified variety 92B52 as susceptible to bacterial blight, brown spot, pod and stem blight, rhizoctonia root rot, bud blight, yellow mosaic, cowpea mosaic, pod mottle and seed mottle.

This does not mean that variety 92B52 is any worse for these problems than other varieties of similar maturity. Rather, we do not consider 92B52 to be immune to these problems. Therefore, we have chosen to be conservative and have identified the line as "susceptible".

Table 1. Isozyme Data

AC02 AC03 AC04 ACP DIA ENP IDH1 IDH2 MDH MPI PGMPHI92B52 2 1 3 Α A Α 2 1 В Α 1 1

92B52 is a mid group II variety. If group II maturities are divided in tenths, the relative maturity for 92B52 is 2.5.
